600th vessel under contract

In February 2011, MESPAS has reached the milestone of 600 vessels that have been ordered to be equipped with the mespas R5 fleet management software system. Among the global customer base of MESPAS, the order for the 600th vessel has been received from Hong Kong based Univan Ship Management.

EPSCO follows MAXRON as Sales Agent for Cyprus

After many years in the maritime industry, Max Huber of MAXRON Services Ltd. recently announced his retirement. The entire MESPAS team wishes Mr. Huber all the best for his well-deserved retirement and would like to thank him again for the very successful cooperation.

EPSCO Cyprus Ltd. has taken over as new sales agent in Cyprus. The company is headquartered in Limassol, Cyprus, with offices in Norway, Singapore and Germany. EPSCO is well known for their safety equipment and extensive range of products and services. By complementing its portfolio with mespasR5, EPSCO is proud to offer an additional value proposition to its customers in the maritime industry. The cutting edge information technology of mespasR5 combined with EPSCO's local experience and expertise is a promising combination for the two partners as well as for ship owners and ship managers. Please contact tito.vinci@mespas.com or visit www.epscocy.com.

MESPAS: SaaS pioneer in the shipping industry

Today, the most innovative Fleet Management Software Systems are based on Cloud Computing and can be accessed as so-called "Software as a Service". In this regard, MESPAS can be called the **SaaS pioneer in the shipping industry**. The benefits of SaaS are clear: to run the software, no additional IT infrastructure or personnel is needed, just workstations with access to the internet or to the offline version. Fast rollout of SaaS applications, since IT infrastructure, software and upgrades are managed by the provider and not by the client. This means, costs involved are purely operational (OPEX) and the cost structure is becoming more transparent. For more information, contact gino.fiore@mespas.com.
