

Newsflash

May 2010

MESPAS AG provides software and services for maritime and land-based technical installations, such as procurement, planned maintenance, stock control, and many other applications. MESPAS is located in Switzerland.

- Tommy Fliski joined the MESPAS
- MESPAS presented at Ship Tek 2010 Dubai
- Cooperation between M.E.R.I. Mumbai and MESPAS

Tommy Fliski joined the MESPAS sales team

On April 1st, 2010, Tommy Fliski joined MESPAS as new Area Sales Manager. He will be responsible for sales activities predominantly in Germany, North America and the Nordic countries, and will also develop business relationships with MESPAS agencies in these countries. Mr. Fliski acquired a strong sales background in the logistics industry at an international level. His broad language skills and the cultural background as Scandinavian citizen are a valuable asset for successfully building and maintaining customer relationships with both existing and prospective customers.

MESPAS presentation at ShipTek 2010 in Dubai

On 18 April 2010, Gino Fiore, Sales & Marketing Director, presented a paper named "How IT software systems can support reliability centered maintenance strategies". The paper discusses how IT systems on the basis of managed services and cloud computing can play a deciding role in terms of "future-proof maritime asset management" in daily operations. If you are interested in viewing this paper, please follow [this link](#) or send an email to gino.fiore@mespas.com.

Cooperation between MESPAS and M.E.R.I. Mumbai (Marine Engineering & Research Institute)

M.E.R.I., the Marine Engineering & Research Institute based in Mumbai, India, has recognized the need to educate their students in the use of a modern fleet management system. MESPAS is very proud to announce that M.E.R.I. has selected mespas R5. As part of the cooperation agreement, MESPAS has agreed to provide software and support.
