- Cloud Computing can change your business
- Welcome to data on demand
- mespas R5 to be installed on Super Yacht

### Cloud Computing can change your business

When talking about cloud computing, people seem to look at one question only. *How can the cloud absorb what we're already doing, but cheaper?* This question has been the topic of many papers, blogs and conferences. The **more important question**, however, was posed by American Pulitzer Prize finalist, Nicholas G. Carr, back in 2008. It is... [Read more](#)

### Welcome to data on demand

With MESPAS, it's easy to create custom reports across your entire fleet. Upon synchronization, all of the data is available in one database with no delay and no human intervention. Users are able to run reports and comparisons according to their own needs. This seamless data transition is unique in the shipping industry! An example: Roughly 1.5 million overhauls ... ### mespas R5 to be installed on Super Yacht

The mespas R5 cloud-based software system is typically used by companies owning/managing ocean-going vessels such as container ships, bulk carriers or tankers. But did you know that mespas R5 is suitable for a wide variety of vessel types? Our cloud-based solution is in use by companies operating vessel types such as... [Read more](#)
